

Based on the **APQC Process Classification Framework (PCF) v7.4** and the **Ad Personam Pricing Process Profile**, here is the granularity correction for the BPMN-to-APQC mapping.

Granularity Assessment Summary

The dominant level in the current mapping is **Level 4 (Activity)**. To ensure functional alignment and process consistency for the "Ad Personam Pricing" process, all misaligned entries (Level 3 Processes or Level 5 Tasks) have been adjusted to Level 4 while strictly maintaining their original **Level 1 Category**.

Granularity Correction Table

BPMN Activity Name	Mapped APQC PCF Activity/Process	PCF ID	Level (1-5)	Granularity Status	Correction Suggestion (if applicable)
Request TBA	Receive Request For Proposal (RFP)/Request For Quote (RFQ)	11781	4	Aligned	-
Request Internal Analysis	Review RFP/RFQ request	11782	4	Aligned	-
Perform Internal Analysis	Assess the internal environment	10019	3	Misaligned	PCF ID 19948 (Analyze internal operations), Level 4 under Category 1.0.

Control Feasibility	Conduct in-house product/service testing and evaluate feasibility	10090	4	Aligned	-
Control Custom Details	Define product/service requirements	11331	4	Aligned	-
Check Time Schedules	Create and manage master production schedule	10224	3	Misaligned	PCF ID 20024 (Create master production schedule), Level 4 under Category 4.0.
Analyze Costs	Develop pricing and scheduling estimates	11788	4	Aligned	-
Monitor Production	Monitor initial production runs	11417	5	Misaligned	PCF ID 10100 (Install and validate production/service delivery process), Level 4 under Category 2.0.

Elaborate Proposal	Develop solution and delivery approach	20015	4	Aligned	-
Assess Proposal	Manage internal reviews	20016	4	Aligned	-
Reformulate Pricing	Revise bid/proposal/quote	20018	4	Aligned	-
Update Pricing in SAP	Communicate and implement price changes	11497	4	Aligned	-
Send Product	Submit/present bid/proposal/quote to customer	11790	4	Aligned	-

Functional Alignment Rationale:

- **Level 3 to Level 4:** Activities like "Assess the internal environment" (10019) and "Create and manage master production schedule" (10224) are classified as Processes (Level 3). They were corrected to their respective execution steps (Level 4) to match the operational nature of the BPMN model.
- **Level 5 to Level 4:** "Monitor initial production runs" (11417) is a Task (Level 5). It was shifted to its parent Activity "Install and validate production/service delivery process"

(10100) to maintain a consistent Level 4 abstraction across the "Ad Personam" lifecycle.
