

Based on the **Process Profile** and the **APQC PCF Taxonomy (Version 7.4)**, I have performed the Scope Correction Analysis.

## Analysis Summary

- **Target Scope:** The "Ad Personam Pricing" process is functionally focused on managing customer requests, developing customized proposals, and setting specific prices. This aligns with APQC **Category 3.0 Market and Sell Products and Services**.
- **Consistency Check:** Several activities were mapped to Categories 1.0 (Strategy), 2.0 (Product Development), or 4.0 (Supply Chain). These are flagged as **Scope Discrepancies** because they fall outside the primary sales/pricing functional "bucket".
- **Correction Logic:** Out-of-scope activities have been reassigned to Category 3.0. Per your instructions, the granularity (Level 4) has been maintained for all suggested corrections.

## Scope Correction Analysis Table

| BPMN Activity Name        | Mapped APQC PCF Activity/Process                           | Current PCF ID / Correction Suggestion | Level 1 Category                          | Scope Status | Correction Suggestion (if applicable) |
|---------------------------|------------------------------------------------------------|----------------------------------------|-------------------------------------------|--------------|---------------------------------------|
| Request TBA               | Receive Request For Proposal (RFP)/Request For Quote (RFQ) | 11781                                  | 3.0 Market and Sell Products and Services | In-Scope     | -                                     |
| Request Internal Analysis | Review RFP/RFQ request                                     | 11782                                  | 3.0 Market and Sell Products and Services | In-Scope     | -                                     |

|                                  |                                                                   |       |                                               |                    |                                                                                           |
